SMAK Santo Albertus graduate studying in science such as physics, biology, and chemistry while actively participating in organizational activities.

EXPERIENCE

KodeKiddo, Surabaya — *Programmer/Coding Instructor*

February 2022 - February 2023

As a coding instructor, I got the chance to teach coding to students ranging from elementary students to university students even teachers at times, the materials that I teach ranges from mobile application development, web development, game development, and more, and the programming languages that were used are Java, JavaScript, HTML, CSS, SQL, and many more. From this experience, what i did was :

1. **Project Planning**, as a coding instructor I needed to coordinate with my coworker and plan what the curriculum and what the teachers are going to teach and discuss with the students in the upcoming work semester.
2. **Tutoring**, I helped teach students and teachers about programming, be it basic programming to get fundamentals to some more complex programming and sometimes helping students with their programming homework by giving explanations
3. **Student Retention**, I also helped get new students into the company as well as help retain old students from leaving the company by making the teaching program more enjoyable for the students.

SKILLS

User Interface Design, User Experience Design, Data Analytics, Figma, Mobile App Programming, Web Development, Database Analysis, SQL, HTML & CSS, Java, Python, JavaScript, Flutter, C, Swift, Kotlin, Tableau, MySQL, Microsoft Office, Wireframe Making, Teamwork, Creativity, Communication, Leadership

4. **Took part in KOMINFO Program.** I Also participated in a KOMINFO (Indonesia's Ministry of Communications and Informatics) program where my part was to help educate teachers from all across Indonesia on computer science in general as well as **Machine learning and Artificial Intelligence**.

PROJECTS

Sportify — Sports Equipment Rental App

Sportify is an app that I made with a couple of my teammates as a final project in Bina Nusantara University. The goal of this app is to simplify the process of renting sports equipment by doing it through an app. This app allows the user to rent the available sports equipment where the payment and pickup point of the equipment will be determined when the user orders.

Kampoeng Heritage Website — A Tourism Spot Website

Kampoeng Heritage Website is a website that I built with a couple of my teammates as a project for one of my task during my studies, the goal of the website is to help people visiting Kampoeng Heritage in Malang to get a better picture of the area, information about it, and have a map that they can access anywhere and anytime through the website.

ORGANIZATIONAL EXPERIENCE

Bina Nusantara Basketball Malang — Core Committee, Staff, and Coordinator

January 2020 - December 2020

As a Core committee, Staff, and Coordinator at Binus Basketball Malang I helped arrange and organize practice schedules, events such as welcoming parties, meet and greet, talk shows, community service, and many more.

Bina Nusantara Basketball Malang — Regional President

January 2021 - October 2022

As a Regional President in Binus Basketball Malang I got the chance to lead an organization where I connected and arranged events with Binus Basketball Jakarta and Bandung, I arranged practice for Binus Basketball Malang, maintained a connection with the players, and participated in many competitions and events.
